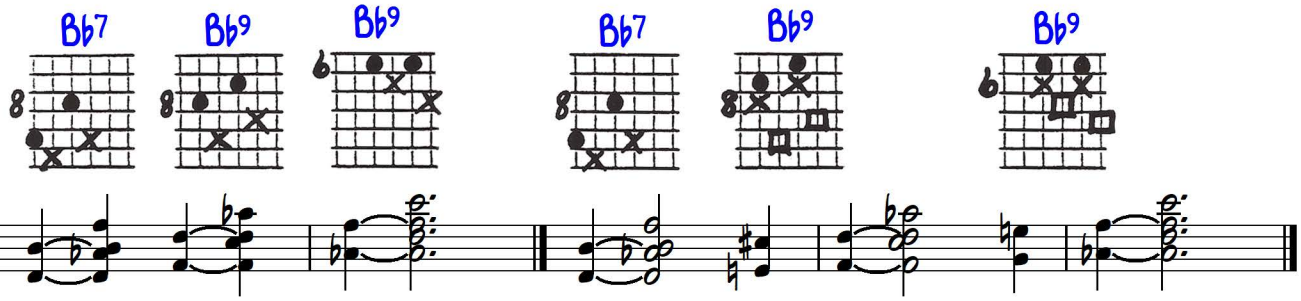
Locked Double-Line Color: Broken Chords and with 1/2 Step Approach Chords

Ted Greene
1992-04-24

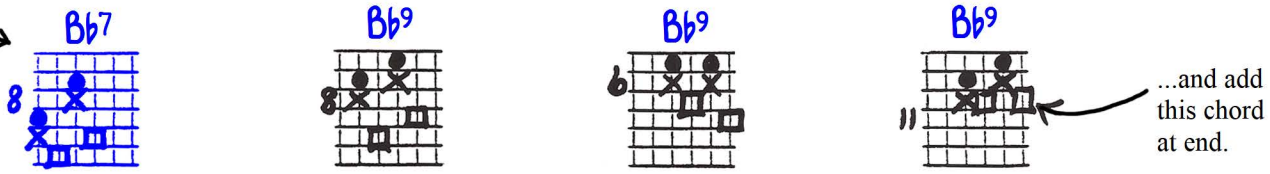
Playing order: ● × □ △
○ = opt.

Key of Bb7



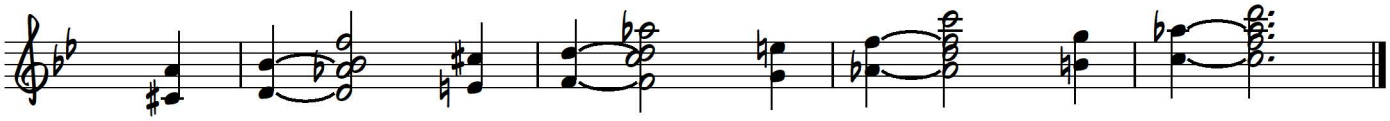
1)

Now try adding the 1/2 step thing in front of chord 1:

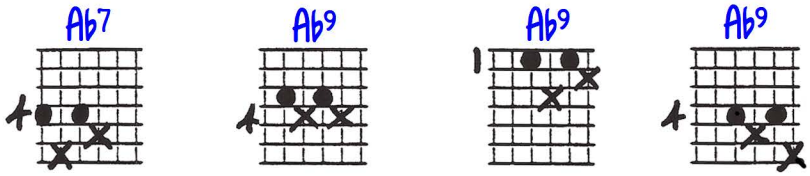


...and add this chord at end.

1a)

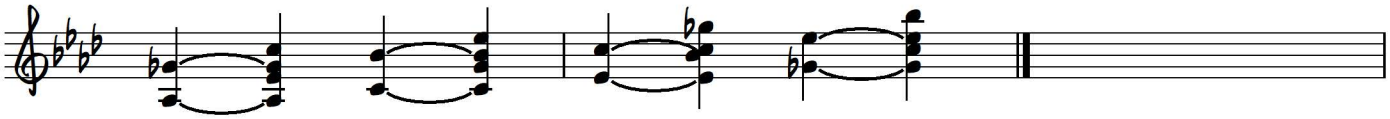


Key of Ab7



And after you can play these fluidly, add the 1/2 step approach tones on all four chords.

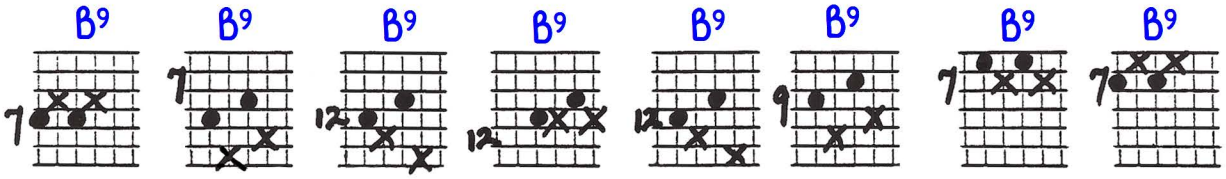
2)



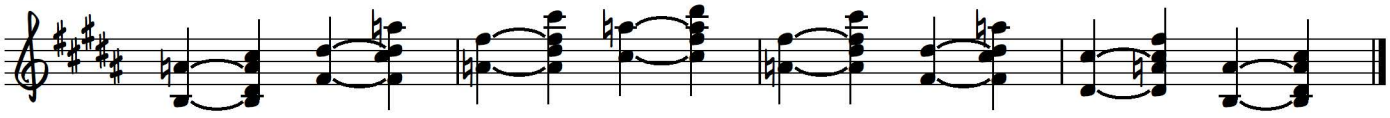
Why do you think this was added on the way down?

Similar but different:

Key of B7



3)



By the way, if you didn't automatically play the prior examples with a "reverse order" of diagrams added on (simply creating the ascending-descending motion as in [example #3]), please do so.
