

# TED GREENE

## SOLO GUITAR

# THE LEGENDARY GUITARIST'S RECORDING DEBUT

PMP A-5010 (First Pressing)

This album was recorded in two separate recording sessions. The only performer is Ted Greene, and no “over dubbing” (multiple track recording) was done. (Although we did take advantage of modern recording techniques to reduce unwanted guitar and amplifier noise, we did not record this album with any of the popular “noise reduction systems” currently in use. We did not wish to risk “coloring” Ted’s guitar sound.) Each song is recorded as Ted might perform it “live”.

The rotary phasing effect is the result of simultaneously recording the guitar through “the board”, and through a small Leslie rotating speaker.

We are very pleased to have collaborated with Ted on the creation of this album, and to make it available to all of his friends and admirers (who have waited so long), and we are looking forward to future efforts with Ted.

Leon White  
William Perry
