Try to eventually get these chords to ring true on as low a fret as possible. Practice these chords for at least 50-60 minutes everyday (you don’t have to play all of them each day, a few will do). Starting on high frets and working your way down to the lower frets gradually. You will be amazed at the result in a few weeks. Nature will reshape your hands (improvably).

DO THESE EXERCISES DOWN CHROMATICALLY - THAT IS, KEEP LOWERING THEM ONE FRET AT A TIME.
